

# DEAR PARENTS,

Welcome! You've made an exciting choice for your child's learning journey- the BRICKS CHALLENGE program!

## NURTURING FUTURE INNOVATORS WITH AI SUPPORT

We've crafted Bricks Challenge to make complex scientific principles tangible and fun for ages 6-10. Our program develops a strong foundation in mechanics, while AI support through the BuildWise App helps students better understand how each model works. This combination of physical building and smart technology supports creativity, critical thinking, and problem-solving skills for the 21st century.

## EMPOWERING YOUR CHILD'S POTENTIAL

### EXPLORING MECHANICS, PHYSICS, AND AI-SUPPORTED ENGINEERING, YOUR CHILD WILL:

- Discover the world of structures, learning about stability, and the importance of different parts and measurements in building.
- Delve into the principles of mechanical transmission. They will understand the nuances of belt and gear transmissions and the diverse applications they have in our everyday lives.
- Learn about the laws of physics in an interactive way, such as the Lever Principle of Archimedes, or the principle of Centrifugal Force.
- Use AI Chat to receive guided explanations and deepen their understanding of the engineering concepts behind each model.
- Understand the mechanisms of different gears systems like crown gears and worm gears, and their implications in complex machinery.
- Grasp the principles of symmetry, the concept of axis turn, and the functioning of mechanical advantage devices.
- These lessons not only foster understanding but also encourage creativity, critical thinking, and problem-solving skills, essential for the engineers of the future.
- And much more!

## KICKSTART A LIFELONG LEARNING JOURNEY

With Bricks Challenge, your child isn't just learning; they're embarking on an exciting lifelong journey of discovery and innovation. Congratulations on choosing an enriching path for your child's educational journey.
