

DEAR PARENTS,

Welcome to Smartivo - your child's first step into the world of coding through interactive on-screen play and exploration!

Where Coding Begins with Curiosity and Play!

Designed especially for children aged 4-6, Smartivo uses child-friendly **GoAlgo App** and story-based challenges to turn early coding into an exciting adventure. Children learn real coding logic by moving, building, and playing.

DEVELOPING ESSENTIAL EARLY SKILLS

Through guided missions and creative activities, your child will:

- ⚙️ Learn foundational coding concepts - including sequences, move commands, conditions, lights, sounds, loops, and even multithreading!
- ⚙️ Strengthen logical thinking, planning, and sequencing
- ⚙️ Build resilience through hands-on problem-solving
- ⚙️ Improve communication and social skills through teamwork
- ⚙️ Build confidence as their robot reacts to the code they created

The Smartivo Lesson Experience

Each Smartivo session follows a playful, three-part format:

• Story-Based Learning

Each lesson begins with a fun story that sets the scene for the mission. The story connects to the themed **Adventure Board** and is followed by **Adventure Cards** that guide the robot's path and actions.

• Screen Coding

Children build code using **GoAlgo App's visual coding interface**, then set Smartivo robot on its mission, making it an unforgettable experience!

• Live Execution & Play

They press play and watch Smartivo move, respond, and complete challenges - debugging and exploring along the way.

Learning Through Every Transformation

With the addition of special components called **extensions**, Smartivo transforms into unique roles like a **Transporter**, **Satellite Spotter**, **Sketching Robot**, or **Snowplow**. These transformations make each mission more dynamic, imaginative, and engaging - keeping children excited for what comes next.

Inspiring Young Minds Through Play

Smartivo nurtures curiosity, independence, and early STEM interest while making learning joyful, active, and social.

Thank you for choosing to start this exciting journey with us!
