

## Grade: Grade 8 · Mathematics

### Linear Graph Masters

Focus: Algebra · Graphs · Slope

1. Plot the line  $y = 2x + 1$ .
2. Find the slope of  $y = 2x + 5$ .
3. Write the equation of a line through  $(0, 5)$  with slope 2.
4. Find the x-intercept if  $y = 0$ .
5. Draw a line parallel to  $y = 3x + 2$ .
6. Mark the intersection point of two lines.
7. If  $x = 2$ , find  $y$  for  $y = 2x + 5$ .
8. Explain what the slope means in real life.
9. Write an equation for a line with slope  $-1$  and y-intercept 4.
10. Describe one example where graphs show change over time.

#### Tutoring Tip:

Show how slope represents rate of change using simple motion examples.
