

□ KRIANA WORKSHEETS – Answer Key

Grade 9 · Science — Sustainable Practices Worksheet V1

Focus: Answer Key

Answer: 1. Sustainable practices are actions that use resources responsibly to protect ecosystems for the future. They are important because they reduce environmental damage and preserve resources.

Answer: 2. Indigenous land stewardship includes practices that emphasize respect for nature, balance, and renewal, such as harvesting only what is needed and maintaining natural cycles.

Answer: 3. Conservation strategies may include protecting wetlands or restoring forests. These actions help maintain habitats, support biodiversity, and reduce ecosystem damage.

Answer: 4. Renewable energy sources like wind and solar help sustainability because they produce energy without depleting resources or releasing harmful pollution.

Answer: 5. Answers vary. Examples include recycling, reducing water use, choosing reusable items, or conserving electricity. These choices reduce waste and environmental impact.
