

□ KRIANA WORKSHEETS – ANSWER KEY

Ecosystems – Home Practice (Answer Key)

Focus: Ecosystem Structure · Niches · Food Webs · Energy Flow

1. List two biotic and two abiotic factors described or implied in the passage.
2. What is a niche? Provide one example from any ecosystem.
3. Explain why producers are essential to all ecosystems.
4. Describe how energy flows from producers to consumers and then to decomposers.
5. Draw or describe a simple 4-step food chain based on the passage.
6. What makes food webs more stable than food chains?
7. Write a 2–3 sentence summary explaining how biotic and abiotic factors interact to create a functioning ecosystem.

Tutoring Tip:

Connect each answer to a real ecosystem such as a forest, ocean, or pond to reinforce understanding.
