Skills Focus

- Composing numbers to 10
- Creating AB/ABC patterns
- Describing shapes

STEM Habits

- Plan, build, reflect
- Use precise words
- Listen & remix ideas

Materials

- Base-ten blocks or linking cubes
- Pattern blocks
- Beat cards
- Tablets with timer (optional)
- Branded worksheet printouts

Rhythm Builders Math Lab

Facilitator playbook

Math Warm-Up (5 min)

Chant the Kriana Counting Beat while students tap sticks together. Build bundles of 5 using the poster.

Inquiry Launch (8 min)

Demonstrate designing a "sound tile" by arranging pattern blocks on the worksheet grid. Count total shapes and record the number sentence.

Workshop Flow (12 min)

Teams build their own rhythm mosaics. Halfway, cue a "Remix Moment" where students trade one tile and explain how the pattern changes.

Reflection Circle (5 min)

Learners place their sheet on the Brilliance Board. Share one math concept and one feeling word about the build.

Extend the learning

Home connection: Send a mini-card inviting families to clap out the beat using household objects.
