Measure & Play Lab

Focus: Measurement · Comparison · Hands-on Math

1. Measure your pencil with paperclips.
2. Which is taller — cup or bottle?
3. Draw a short and a long line.
4. Circle the heavier object — rock or feather?
5. Compare: which block stack is higher?
6. Count how many steps from desk to door.
7. Sort objects from shortest to tallest.
8. Estimate your shoe length in cubes.
9. Draw a tall tree and a small flower.
10. Use hands to measure your book.

Tutoring Tip:

Let children use classroom items to compare and estimate real measurements.
